

Configurare una DVWA e utilizzo dell'applicazione Burp suite

Dopo aver configurato la DVWA (damn vulnerable web application) in kali linux, tramite l'utilizzo dell'applicazione Burp suite abbiamo filtrato la connessione alla pagina di login.

Successivamente abbiamo modificato i parametri di accesso, quali Username e Password

```
POST /DVWA/login.php HTTP/1.1

```

Abbiamo potuto constatare nel body http che con le credenziali errate non abbiamo potuto effettuare l'operazione di login.
